Jogeshwari(E), Mumbai-60

PROFESSIONAL SUMMARY

Full Stack Developer with 1.5+ years of professional experience building and maintaining web applications using React.js, Node.js, Express.js, MongoDB, SQL, and Redis. Skilled in backend development, REST API design, microservices, production support, and performance optimization. Experienced in delivering client-driven enhancements, troubleshooting critical production issues, and contributing to scalable SaaS platforms serving 100+ client organizations.

TECHNICAL SKILLS

Frontend: React.js, TypeScript

Backend: Node.js, Express.js, REST APIs, WebSockets, BullQ

Databases: MongoDB, MySQL, Redis

Tools & Technologies: Git, Docker, Postman, Linux, Microservices Architecture

Other Skills: Debugging, Production Support, Problem Solving, Team Collaboration

PROFESSIONAL EXPERIENCE

SlashRTC Software Services

Jr. Software Developer

October 2024 - June 2026

- Maintained and enhanced backend services for a Dialer SaaS platform serving 100+ client organizations, supporting 30+ microservices and contributing to production releases and feature deployments.
- Diagnosed and resolved L3 production issues, ensuring application stability and reducing downtime.
- Delivered client-specific customizations based on business requirements within the customer delivery team.
- Delivered 70+ change requests and development tasks across backend services, reporting modules, and platform integrations, including feature enhancements, production fixes, and performance improvements.
- Reduced API response time by approximately 60-80% by optimizing SQL query execution and implementing Redis pipelining, resulting in faster data retrieval and improved user experience..
- Built and enhanced an automated report scheduling module supporting client organizations and executing 50+ scheduled report jobs monthly, improving reporting efficiency and reducing manual intervention..

PROJECTS

Chat Application | React.js, Node.js, Express.js, MongoDB, Socket.IO

- Designed and implemented real-time Socket.IO events for message delivery, typing indicators, user presence, and connection lifecycle management.
- Integrated BullMQ and Redis for queue-based message processing, improving application scalability and ensuring reliable message handling during concurrent user activity.
- Developed secure authentication and authorization workflows using JWT, enabling protected access to chat conversations and user resources.

MyNotebook | React.js, Node.js, Express.js, MongoDB, JWT

- Developed a full-stack note management application using the MERN stack with JWT-based authentication.
- Built RESTful APIs and responsive user interfaces to support secure CRUD operations for user notes.

EDUCATION & CERTIFICATIONS

Bachelor of Science (Information Technology)

Patkar Varde College

CGPA : 9.3
